

## Harness Fit Record

This chart will help you remember how to put your harness back together after cleaning it, by recording the holes your animal usually uses. It can be a reference to tell you if your animal is changing shape through conditioning, or abundant grazing. If you use a harness on more than one animal it will help you switch it back to fit.

## HARNESS ADJUSTMENT RECORD

BRIDLE	Horse #1	Horse #2	Horse #3
Top of cheek piece by crown			
Bottom cheekpiece by bit			
Throat latch			
Noseband			
curb chain			
<b>BREASTPLATE</b>			
front hanger strap			
rear hanger strap			
false martingale			
traces			
<b>SADDLE</b>			
tug strap			
girth L			
girth R			
backstrap			
crupper			
<b>BREECHING</b>			
front hanger strap			
rear hanger strap			
holdbacks			
# wraps			
hole			
<b>FOR PAIRS</b>			
Rein adjustment coupling rein			
left animal			
right animal			

Holes are counted by their distance from the “point” or end of a strap.
